EDUCATION

- 2023 - 2027
SUPERIOR UNIVERSITY
- Bachelors of Computer Science

SKILLS

- System Design
- API Architecture
- Backend Development
- Frontend Engineering
- Database Design
- Performance Optimization
- Real-Time Systems

LANGUAGES

- English (Fluent)
- Urdu (Native)

PROFILE

I build scalable, real-world web applications with clear architecture, clean code, and maintainable systems. I specialize in full-stack development with React, modern backend frameworks (NestJS, FastAPI), real-time systems (WebSockets), and production-ready database design (PostgreSQL, SQLite, Supabase/Appwrite integrations). I focus on features that matter: authentication, state management, real-time communication, clean APIs, performance, and reliability.

WORK EXPERIENCE

- Innovent Tech** JUL 2025 - SEP 2025
Full Stack Intern
 - Worked as part of a development team to build and maintain full-stack web features using the MERN stack.
 - Developed RESTful APIs and integrated them with React frontends..
 - Improved application performance by optimizing API responses and reducing frontend load times.
 - Followed professional workflows including Git-based version control, code reviews, and task-based development.
- Independent / Product-Based Projects** 2021 - Present
Full Stack Developer
 - Designed and built production-style applications with authentication, real-time updates, and clean API architectures.
 - Built scalable frontends with React, Next.js, Tailwind, and TypeScript.
 - Implemented backend systems using FastAPI, NestJS, Express, and Node.js.
 - Worked with PostgreSQL, SQLite, MongoDB, Supabase, Appwrite, and Redis for different data and caching needs.
 - Focused on security (JWT, rate limiting), performance, and maintainable system design.
